DATE: July 7, 2006

RE: June 2006 Wood Stork Aerial Survey Observations

Dear Relicensing Stakeholder:

The June 2006 Lake Murray wood stork survey was conducted on Friday, June 30th. The weather was extremely hot and hazy during the survey and overall wading bird activity was limited to scattered sightings of foraging great egrets and great blue herons. No wood storks were observed. Thank you for your continued interest in the Lake Murray Wood Stork Study, and as always, please feel free to contact me should you have any questions.
