

MEMORANDUM

TO: All Saluda Hydro Project Relicensing Stakeholders

FROM: Shane Boring, Environmental Scientist

DATE: October 10, 2005

RE: September 2005 Wood Stork Aerial Survey Observations

Dear Relicensing Stakeholder:

The September aerial survey for wood storks on Lake Murray was performed on September 30, 2005. No wood storks were observed at any of the foraging, roosting, or potential nesting sites. Thanks for your continued interest in the Lake Murray wood stork surveys, and as always, please feel free to contact me should you have any questions regarding the study.
